

METHODOLOGY

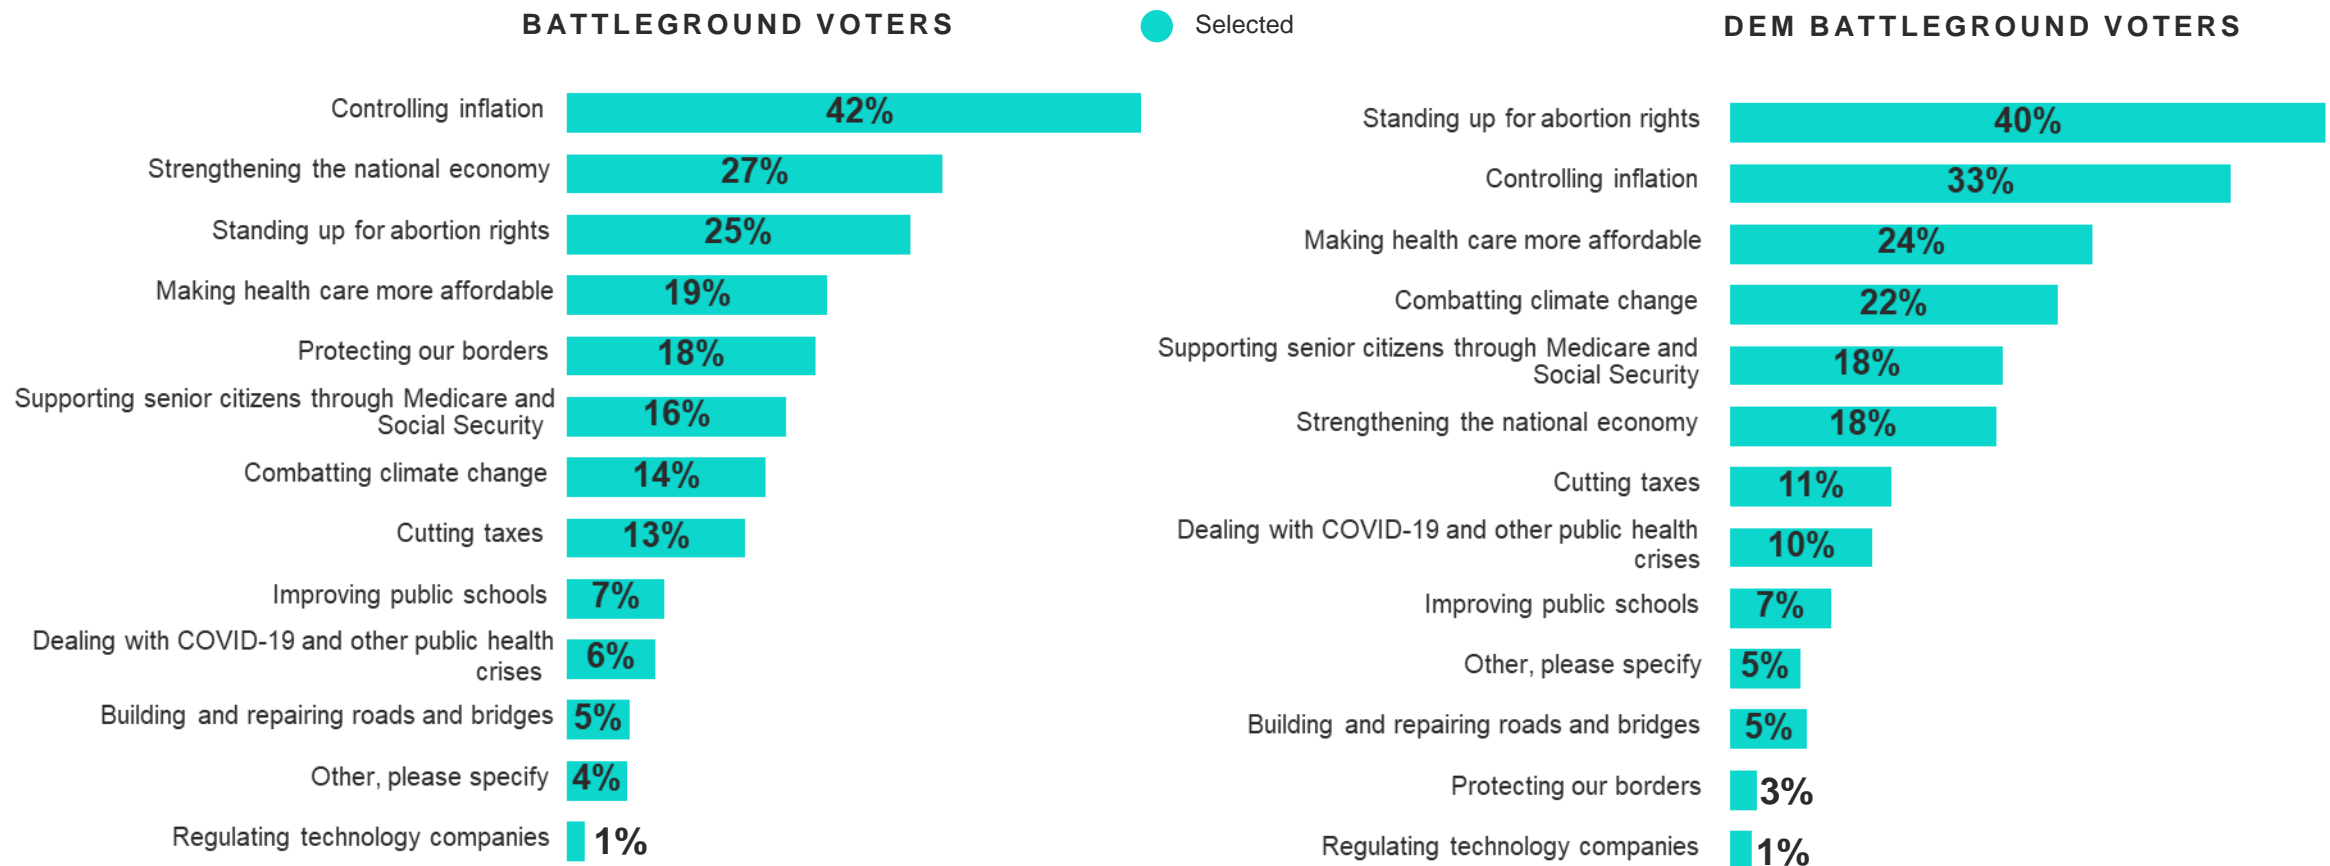

This poll was conducted between September 1-7, 2022 among a sample of 2,650 voters in AZ, CO, GA, NV, and NH (referenced as *battleground voters* throughout). The interviews were conducted online and the data were weighted to approximate a target sample of voters in these states using two stage weighting: The first stage weights were based on gender by age, educational attainment, race, and marital status and the second stage was based on relative state population. Results from the full survey have a margin of error of +/- 2%.
