1 **INTRODUCTION**

2 COMPUTER & COMMUNICATIONS INDUSTRY ASSOCIATION (“CCIA”),¹
3 NETCHOICE, LLC (“NetChoice”),² and CHAMBER OF PROGRESS³ hereby respectfully
4 submit this brief *amici curiae* in support of the Motion to Dismiss of Defendant Amazon.com, Inc.
5 (Dkt. #84) and the Motion to Dismiss of Defendants Lindsay, Grandinetti, and Ghani (Dkt. #83).

6 **ARGUMENT**

7 **I. THE AMENDED COMPLAINT ATTEMPTS TO IMPOSE CIVIL LIABILITY**
8 **FOR ALLEGED FAILURE TO COMPLY WITH STANDARDS THAT ARE NOT**
9 **BINDING LAW.**

10 The Amended Complaint alleges a number of grievances but fails to lodge a claim for
11 relief. The standards under which the Federal Trade Commission (“FTC”) wishes, for purposes of
12 this litigation, to hold Defendants liable are not codified in any statute or regulation. This case
13 typifies the reason Fed. R. Civ. P. 12(b)(6) was created: it fails to set forth a legal theory by which
14 the Court could find that any Defendant violated the law.

15 The conduct alleged in the Amended Complaint is the subject of an FTC rulemaking that
16 commenced April 24, 2023.⁴ Public comment on new proposed rules intended “to improve [the

17
18 ¹ CCIA is an international, not-for-profit trade association representing a broad cross section of
19 communications and technology firms. For more than 50 years, CCIA has promoted open markets, open
20 systems, and open networks. CCIA members employ more than 1.6 million workers, invest more than
21 \$100 billion in research and development, and contribute trillions of dollars in productivity to the global
22 economy. A list of CCIA members is available at <https://www.ccianet.org/members>.

23 ² NetChoice is a national trade association of online businesses that share the goal of promoting free
24 enterprise and free expression on the internet. NetChoice’s members operate a variety of popular
25 websites, apps, and inline services, including Meta, YouTube, and Etsy. NetChoice’s guiding principles
26 are promoting consumer choice, continuing the successful policy of “light-touch” internet regulation, and
27 fostering online competition to provide consumers with many choices. A list of NetChoice’s members is
available at <https://netchoice.org/about/#association-members>.

³ Chamber of Progress is a tech-industry coalition devoted to a progressive society economy, workforce,
and consumer climate. Chamber of Progress backs public policies that build a fairer, more inclusive
country in which the tech industry operates responsibly and fairly, and in which all people benefit for
technological leaps. Chamber of Progress seeks to protect internet freedom and free speech, to promote
innovation and economic growth, and to empower technology customers and users. A list of Chamber of
Progress’ partners is available at <https://progresschamber.org/partners/>.

⁴ *Negative Option Rule*, 88 Fed. Reg. 24716 (Apr. 24, 2023) (to be codified at 16 CFR Part 425) (the
“NPRM”).

1 FTC's] existing regulations for negative option programs,” *id.*,⁵ were due two calendar days *after*
 2 this lawsuit was filed. Dkt. #1. In seeking comment on these proposed rules, the FTC admitted
 3 that “[t]he existing patchwork of laws and regulations does not provide industry and consumers
 4 with a consistent legal framework across media and offers.” NPRM, 88 Fed. Reg. at 24718. The
 5 FTC also admitted, with regard to the Restore Online Shoppers’ Confidence Act, 15 U.S.C. §§
 6 8401-8405 (“ROSCA”), which forms the legal predicate for every Count of the Amended
 7 Complaint, that “ROSCA lacks specificity about cancellation procedures and the placement,
 8 content, and timing of cancellation-related disclosures.” *NPRM.*, 88 Fed. Reg. at 24718. And yet
 9 the Amended Complaint seeks civil penalties, monetary relief, and a permanent injunction, Dkt.
 10 #67 p.91, for the alleged failure to appropriately place, explain, and plan the disclosure of how
 11 consumers may cancel Prime and Prime Video service. *E.g.*, Dkt. #67 ¶¶ 127-176.

12 The FTC also acknowledged in the NPRM that ROSCA “requires marketers to provide
 13 ‘simple mechanisms’ for the consumer to stop recurring charges *without guidance about what is*
 14 *simple.*” *Id.*, 88 Fed. Reg. 24718 (emphasis added). But in the Amended Complaint, the FTC
 15 alleges that the cancellation process for Prime and Prime Video is “not simple,” Dkt. #67 ¶¶ 17,
 16 22, despite having acknowledged just weeks earlier in the NPRM that “simple” is a statutory term
 17 that the agency has not explicated in any rule implementing ROSCA.

18 The cart is decidedly before the horse in this lawsuit. A potential liability clock—the
 19 possible accrual of civil penalties and other monetary relief (Dkt. #67 p.91)—has been started
 20 without the necessary legal predicate having been established. The *Negative Option Rule*
 21 proceeding is only partly underway. Meantime, the Court and all parties are devoting significant
 22

23 ⁵ The Court can take notice of the content of the NPRM as it considers the Motions to Dismiss, because it
 24 is a document in the public record that is not disputed as to its veracity. *E.g.*, *Black v. Arthur*, 18 F. Supp.
 25 2d 1127, 1131 (D. Ore. 1998) (“courts are allowed to take judicial notice of matters in the general public
 26 record, including records and reports of administrative bodies and records of prior litigation, without
 27 converting a motion to dismiss into a motion for summary judgment”); *see also King v. Cty. of L.A.*, 885
 F.3d 548, 555 (9th Cir. 2018) (taking notice of “undisputed and publicly available information displayed
 on government websites”); *Tovar v. Midland Credit Mgmt.*, Case 3:10-cv-02600-MMA-MDD, 2011 WL
 1431988 (S.D. Cal. Apr. 13, 2011) (taking notice of, *inter alia*, FCC NPRM) (citing *Nw. Envtl. Advocates*
v. U.S. E.P.A., 537 F.3d 1006, 1026-27 (9th Cir. 2008) (taking judicial notice of statements in EPA
 “request for comments”)).

1 resources to litigating claims that as yet are unformed. In addition, permitting this case to proceed
 2 will create uncertainty for all online subscription arrangements, because it could embolden
 3 regulators to impose any substantive decision reached here on absent parties—regulation by way
 4 of litigation. The more prudent path—the result likely required by Fed. R. Civ. P. 12(b)(6)—is for
 5 the agency to complete its rulemaking and, if the resultant rules are adopted in accordance with
 6 prevailing administrative law, revisit the practices challenged in the Amended Complaint for
 7 determination whether the agency should pursue civil remedies.

8 It bears mention that the new, proposed rules under consideration in the *Negative Option*
 9 *Rule* proceeding fail to acknowledge that subscription plans, as well as the special offers that many
 10 companies offer in response to cancellation inquiries, provide considerable benefits to consumers.
 11 This failure imperils the agency’s statutory authorization to seek redress for subscription plans and
 12 cancellation processes that it finds unsalutary. Section 5 of the FTC Act states that the FTC “shall
 13 have no authority ... to declare unlawful an act or practice” unless it finds that the practice is “not
 14 outweighed by countervailing benefits to consumers or to competition.” 15 U.S.C. § 45(n). The
 15 NPRM does not discuss the benefits of online retailers’ practices—including the very practices
 16 denounced in the Amended Complaint—when they verify a consumer’s intent to cancel a
 17 subscription and offer a sweetened deal, in the form of additional discounts or gifts, to dissuade a
 18 consumer from cancelling.⁶ The NPRM likewise omits discussion of how subscription plans make
 19 provisioning cycles predictable and enable retailers to offer lower prices. The Amended Complaint
 20 makes the same omissions. The question arises whether the agency is attempting to obtain a ruling
 21 from the Court that its own record could not support. In any event, the Defendants are being held
 22 to an aspirational standard that is not codified in applicable law. Forcing Amazon and the three
 23 new, individual Defendants to defend these unformed claims seems both unjust and wasteful for
 24 the Court and all parties.

25 *Amici* therefore support the dismissal of the Amended Complaint as to all Defendants.

26 _____
 27 ⁶ The Amended Complaint alleges that, for example, “Amazon presented consumers with alternative or
 discounted pricing,” Dkt. #67 ¶ 143, but fails to acknowledge that such offers can render challenged
 conduct lawful under Section 5. 15 U.S.C. § 45(n) (“not outweighed by countervailing benefits”).

1 **II. THE AMENDED COMPLAINT ATTEMPTS TO PUNISH AMAZON FOR ITS**
 2 **ONGOING EFFORTS TO STUDY AND ENHANCE THE CUSTOMER**
 3 **EXPERIENCE.**

4 This lawsuit rests in large part upon a misapprehension of a regulated entity's attempts to
 5 improve its retail transaction flows, creating an unfortunate precedent that could deter companies
 6 from cooperating with regulators and delivering better customer service. Both the apparent intent
 7 and the inevitable consequences of this effort should be rejected by the Court. Not only is this case
 8 devoid of applicable law, but it also might erode confidence in the nation's executive agencies.

9 The Amended Complaint lodges several allegations to the effect that Amazon often revised
 10 its webpages to make the subscription and cancellation processes clearer. *E.g.*, Dkt. #67 ¶¶ 53, 62,
 11 118-19, 127. Perversely, the agency presents this conduct in a nefarious light, as if these
 12 improvements are grounds for imposing liability. If the FTC is attempting to obtain relief from
 13 Defendants on the basis that they took action to make the consumer experience *better*, this case is
 14 an unfortunate instance of misplaced executive action. The aim of regulators should never be to
 15 sacrifice earnest improvement in the search for the nominal value of filing a lawsuit.

16 Even if some of the acknowledged improvements were made in response to an FTC
 17 inquiry, which is not true of every improvement, the Court is being asked to try Defendants for the
 18 offense of acceding to the advice of a federal agency. However the Amended Complaint may
 19 characterize the Amazon-FTC interactions (“substantial pressure”, Dkt. #67 ¶ 127), the allegations
 20 include several instances in which Amazon voluntarily acted in the interests of consumers. And
 21 the Amended Complaint highlights three separate initiatives at the company to make the
 22 subscription and cancellation operations easier.⁷ Not only do these allegations serve the balancing
 23 exercise that Section 5 requires prior to a finding of wrongdoing, they also raise concerns that
 24 Defendants are facing civil liability *because* they took ameliorative action. These concerns further
 25 support dismissal of this case.

26 The digital economy is the greatest engine for economic growth in perhaps a century. The
 27 technology and online services industry, like any industry, depends on regulatory certainty and a

⁷ Dkt. #67 ¶¶ 188 (“Customer Frustrations Elimination Program”), 194 (“Project Lucent”) 218 (“Clarity Working Group”).

1 stable legal rubric in order to succeed, innovate, and grow. Consumer confidence is a crucial
2 component of stability. This lawsuit, for the reasons described herein, introduces uncertainty and
3 discord to the online ecosystem, making companies second-guess the way that they interact with
4 regulators and build their compliance programs. The risk of uncertainty is heightened when it
5 appears that an agency intends to apply an adjudicated result as if it were an administrative rule of
6 general application. The Court should be mindful of these unfortunate consequences on review of
7 the Motions to Dismiss.

8 **CONCLUSION**

9 For all these reasons, the Court should dismiss this case as to all Defendants.

10 DATED this 25th day of October 2023.
